PATENT

TRANSPORTABLE, POSITIONABLE, DIRECTIONAL
INSECT CONTROL SYSTEM

5 **ABSTRACT**

A transportable, positionable, directionable insect control system comprising a frame supported on one or more wheels for movement over the underlying surface and a handle for use in positioning the insect control system.

10 A tank is mounted on the frame and a pump is employed to discharge an insect controlling chemical agent from the tank under the operation of a control system. The pump directs the insect controlling chemical agent from the tank through conduits to one or more discharge nozzles for

15 discharge therefrom. The discharge nozzles are positionable to control the direction of discharge of the insect controlling chemical agent.
